

Product Information Sheet

CABLE REEL

This sturdy play-out reel makes installing multi-conductor or coaxial cables a one-person job. The installer no longer needs to unwind the cable, lay it flat on the floor and have another installer assist by feeding the cable into a duct. With the Cable Reel, simply place the coil of the cable on the reel and pull the amount needed. The cable basket rotates smoothly without tangling or backlash.

Constructed of sturdy, welded steel. Measures 12-inch high and 25-inch in diameter. Holds up to 200 feet of 25-pair cable. The zinc irridite plating and gold color protects the reel from corrosion, assuring a long and useful life.

Part Number	Description	Shipping Weight
11595-000	Cable Reel	26 lb
