# CABLE MANAGEMENT ARM KIT

Now you can manage the cables of electronic equipment installed on the CPI Sliding Equipment Shelf and the CPI Extra-Extended Sliding Equipment Shelf. No more tangles, twists or damage from cuts, kinks, etc. during shelf extension or retraction and the proper cable bend radius is maintained. Cables for the electronic equipment installed on the shelf are attached to the arm by 4 Saf-T-Grip® Cable Management Straps (3/4" x 4", black) to keep the cable neat and organized.

- The Cable Management Arm extends and retracts to keep the cables organized, untangled, and attached to the arm
- Made of cold-rolled steel
- Finish is clear over zinc plating
- Keeps cables organized, untangled and attached to the arm
- Can be mounted on the left- or right-hand side of the shelf
- When using the Cable Management Arm, the maximum equipment depth is:
  - 16" for 11415 Series Shelf
 - 22" for 12227 Series Shelf
