MDF 66 BLOCK MOUNTING SYSTEM 19" AND 35"

Use the MDF 66 Block Mounting System for main distribution, centralized equipment or PBX applications requiring a high-density, space-saving 66 Block Mounting System. The MDF 66 Block Mounting System includes a 19" wide or 35" wide 6" Deep Standard Rack and several 66 Block Mounting Brackets.

Premise cables enter the top or bottom of the rack between the 6" deep rack channel uprights. 66-style blocks attach to the front of the block mounting brackets (mounting screws are included). Use the U-shaped cable rings on the top of the brackets to route jumper cords between blocks. Available in single-sided or double-sided configurations, the frame can be junctioned together in multiple frame line-ups.

The MDF66 Block Mounting System is pre-assembled and ready-to-go right out of the box. Choose the 19" or 35" rack, single- or double-sided, in black, gray, white or clear (grained aluminum) finish.

- System ships fully assembled
- 1200 to 2700 pair can be mounted per side depending on the frame selected
- Double-sided version provides 2400 to 5400 pair depending on the frame selected
- Large cable loops attached along top provide efficient cable management
- Supports 66M1-25, 66M1-50, 66M4-50, 66M4-100 blocks as well as 66 Type Blocks with side mounted connectors (pair count will be less due to additional space requirement)
