

NEW CATALOG ITEM

BENEFITS:

- Retractable Stabilizer Kit improves safety by providing anti-tip bracing for CPI Cabinets that have not been bolted to building structure.
- When rack-mount equipment is not being serviced, Stabilizer remains under the cabinet, keeping aisles clear for service carts.
- Perforated floor tiles located in front of the cabinet remain unobstructed, allowing cool air to flow freely.

RETRACTABLE STABILIZER KIT FOR CABINETS

Retractable Stabilizer Kit is a floor-level brace that provides anti-tip protection when heavy, slide-mounted equipment is extended in front of the cabinet. When not in use, the Stabilizer can be retracted under the cabinet for unimpeded aisle space and improved cabinet appearance.

Designed specifically for CPI MegaFrame® and SlimFrame™ Cabinets, the Retractable Stabilizer provides anti-tip support for servers up to 300 lb. Safe use requires that servers are secured in the closed position prior to extending the stabilizer feet and that only one server at a time be extended for service. The best anti-tip protection requires bolting the cabinet to the floor using floor anchor clamps, which are included with each cabinet.

The Stabilizer is recommended for new cabinet installations as access to the bottom interior of a populated cabinet may be difficult. Leveling feet (included with each cabinet) or casters (P/N 12475-001) are required to support the cabinet, so that Stabilizing Feet can slide freely.

Stabilizer Kits are designed for cabinets 6', 6'6" and 7' high, 19" or 23" wide, and 30", 36" or 39" deep. Select a full or partial kit according to whether or not the cabinet has casters. If the cabinet has leveling feet and no casters, select the full kit. If the cabinet has casters in addition to leveling feet, select a partial kit. Full kits include leveling foot extensions that provide more space between the cabinet bottom and the floor. (These special extensions are not needed when casters have been installed because they are included with CPI caster sets.)

The Stabilizer may be used in combination with CPI Cold Storage Solution: Delphi ECS Enclosure Blower (P/N 12900-001) when the blower is mounted in RMU position two, but cannot be used with the bottom mounted Filtered Ventilation System or Fan Tray (P/N 12510 or 12511).

For more information, please contact your authorized CPI Distributor or CPI Customer Service Representative or go to www.chatsworth.com.

See Reverse for Part Numbers.

RETRACTABLE STABILIZER KIT

Select a kit according to the width and depth of the cabinet.

Note: Kits are available as full or partial configurations. Select a full kit if the cabinet has leveling feet and no casters. Select a partial kit if the cabinet has casters in addition to leveling feet. Full kits include leveling foot extensions that provide more space between the cabinet bottom and the floor. (These special extensions are not needed when casters have been installed because they are included with CPI caster sets.)
