

Motive™ Cable Management System

Motive™ Vertical Cable Manager is a highly configurable and advanced cable management solution that provides unlimited adjustment anywhere within the cable manager, optimizing use of interior space.

ADVANTAGES

Maximum Utilization of Space

The integrated central track system provides unlimited adjustability with versatile, direct support for cable bundles. This system allows for maximum use of interior space, where cables are managed and supported precisely where needed.

Intuitive & Tool-less Design

- Accessory Rod mounts to Motive's central track, features tool-less vertical adjustment and serves as the foundation for all of Motive's cable management accessories.
- Rotating Management Finger accessory attaches to the Accessory Rod and provides cable bundle support and bundle segregation at any point within the cable manager.
- Cable Bundle Swivel accessory attaches directly to Motive's central track, Accessory Rod or Rotating Management Finger and allows for quick attachment, removal and adjustment of cable bundles.
- Half Spool accessory snaps onto the Accessory Rod and provides slack management and bend support for cables.

Attention to Detail

Many design elements, both big and small, are integrated into Motive to enhance the user experience and promote intuitive use.

KEY FEATURES

- Frame has an extruded aluminum profile with an integral central track
- Large radii are designed into many of the frame elements to protect and support cables as they enter and exit the manager
- Touch points are highlighted in blue for easy identification and quick adjustment
- Dual-hinged door opens to the right or left and offers push-to-close convenience
- Hook feature on inside of front door provides a dedicated, secure location to hang a test meter
- Available in a wide variety of heights, widths and configurations

Pioneering Concept

Continuing to build on Chatsworth Products, (CPI) reputation for providing best-in-class cable management systems, CPI has pioneered an intuitive and highly efficient method for managing high-density fiber optic and copper cables with Motive Vertical Cable Manager.

Utilizing an innovative, extrusion-based, integral central track system, Motive features a modular, highly configurable set of cable management accessories that optimize use of interior space, providing more direct cable runs that are supported precisely where needed.

Network cables are efficiently organized, properly supported and physically protected with CPI's Motive Cable Manager.

Supporting Current and Future Cabling Needs

Motive Cable Manager was carefully engineered to mitigate poor cabling practices regarding cable slack, bend radii and organization. It is highly configurable for a variety of applications, now and in the future.

Motive is also well-suited for advanced Power over Ethernet (PoE) applications where higher wattages require adequately-spaced, smaller cable bundles to avoid excessive heat accumulation.

Effortless Deployment

Whether in a small telecommunications room closet or in a large scale enterprise data center, Motive's superior form and functions provide quick and easy moves, adds, and changes through intuitive design and tool-less adjustability.
