## PEDESTAL CLAMP WITH GROUNDING CONNECTOR

Support ground wires from round or square raised floor pedestals using the Pedestal Clamp with Grounding Connector. The connector provides a ground connection for the pedestal and supports up to four wires from the pedestal. Use to create a signal reference grid under the raised access floor using #6 AWG or 2/0 bare round wire. Select the Pedestal Clamp with Grounding Connector to match the style and size of the pedestal and size of the conductor. See the order table below.

- Two styles: Cross and Straight Connectors
- Use Cross Connectors to create signal reference grid intersections; support up to four conductors, two per side, size #6 AWG or 2/0
- Use Straight Connectors to support the signal reference grid in between intersections; support one or two conductors on one side of the pedestal only, size #6 AWG or 2/0
- Manufactured from electrotin plated copper or bronze (P/N 40169-003) with stainless steel installation hardware
- Part numbers 40169-001 and 40169-002 are UL Listed
